## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-3 and 7-12, drawn to a method for the production of extra-wide veneers, classified in class 156, subclass 264.
  - II. Claims 4-6 and 13-20, drawn to an apparatus for producing extra-wide veneers, classified in class 156, subclass 512.
- 2. The inventions are distinct, each from the other because of the following reasons:

  Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus (e.g. an apparatus which has a conveyor belt without vacuum suction for advancing veneers or an apparatus which has a single belt conveyor for advancing the veneers before and after the joining operation).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to Attorney George Quillin on June 21, 2002, to request an oral election to the above restriction requirement, but did not result in an election being made.
